

## DRINKING WATER VIEWER

Live water system  
information at your fingertips!  
Quickly view current SDWIS  
water system data including  
sample results, compliance data,  
inventory, and much more.

### FOIA Requests

Download data extracts

### Data Transparency

SDWIS data for the public, water  
systems, and agency staff

### Flexible Display

Primacy agencies determine what  
data are visible to the public

### Search Options

Single- or multi-system searches  
for drinking water data

# GEC

## DRINKING WATER VIEWER

## HIGHLIGHTS AND FEATURES

### Benefits

- ✔ The public can view data for a chosen water system or search for specific data across many water systems
- ✔ Operators can view information to help them better manage their water system
- ✔ Laboratories can QA/QC data submitted to the primacy agency and download data needed for electronic sample submissions
- ✔ State and EPA staff can pull up live, detailed information from their phone for meetings, conferences, or on-site visits

### Modern Technologies

DWV uses modern technologies (e.g., web services/APIs) that will be compatible with SDWIS Modernization.

### Integration

DWV can be integrated with other GEC applications to display Submittals Lead Service Line information or custom, state-specific CCRs generated in RECAP.

### Customization

- ✔ DWV's robust admin module lets agencies customize the application's appearance (i.e., color scheme and logos) and control which data is displayed for public vs. authenticated users
- ✔ Agencies can edit page descriptions, grid help information, and help links to help users access and understand the data

### Accessibility

DWV is a user-friendly, intuitive application designed to enable any user to find drinking water data for their state, including:

- ✔ Water System Inventory (e.g., facilities and sampling points)
- ✔ Samples
- ✔ Violations
- ✔ Enforcements
- ✔ Schedules & Activities
- ✔ Site Visits
- ✔ Deficiencies

GEC meets top notch SOC 2 Type 2 security standards within its Microsoft Azure Government Cloud
