

## CERT TRACKER

FOR OPERATOR  
CERTIFICATION PROGRAMS

Cert Tracker's mobile responsive web application allows states and operators to prepare and approve applications, track operator's status, and confirm compliance with state certification requirements.

Track appropriate certifications for individuals or by facility

Operators and state collaborate to maintain data in cloud-based application

Integrate with state payment system to pay fees and get receipts

Dashboard metrics track progress and certification status

Communication via text, dashboard or email between operators and state

**CERT TRACKER**  
FOR OPERATOR CERTIFICATION PROGRAMS

## BENEFITS AND FEATURES

### Manages all Operator Certifications

- ✓ Accommodates any certification type, e.g., Drinking Water, Wastewater, Well Drillers, Pump Installers.
- ✓ Uses state-specific certification requirements.
- ✓ Organizes by current and expiring licenses, operator type/grade, or facility.

### Tracks Progress Toward Certification

- ✓ Tracks education, experience, Continuing Education Units (CEU), exams and payments.
- ✓ Shows available course lists.
- ✓ Sends email notifications to operators (e.g., exam pass/fail, renewal reminders).

### Illustrates Career Path

- ✓ Lists what courses and exams the operator has completed.
- ✓ Identifies career paths for operators to grow their expertise.
- ✓ Shows the criteria necessary to reach a higher level of certification.

### Streamlines Data Entry

- ✓ Both operator and state users can access profiles to make updates to records.
- ✓ Audit system for the state to oversee the operator-controlled profiles.
- ✓ Reduces state workload.

### Enables Customization

- ✓ Integration with state's payment processing systems.
- ✓ Certificates, letters, reports, and other materials can be customized to meet state brand.

### Assures Proper Certification for Facilities

- ✓ Contains basic information about each facility/system which requires a certified operator.
- ✓ Links operators with facilities.
- ✓ Determines the required operator certification classification type and grade, then identifies facilities with inadequate or missing operators.

GEC's SOC 2 compliant software and client data are housed in Microsoft's Azure Government Cloud
